

SLINGSHOT RGB KIT #4 REAR SWING ARM

Kit #4 Custom length RGB kit halo
Rear swing arm extension
Alcohol pad, primer

- (1) 20" RGB strip
- (1) 16" extension

Rear of SS on passenger side. You have an open male end here. Connect the 16" extension from here to the rear swing arm. Leave about 1" of slack on the line for the rear swing arm to articulate up and down. Test fit the LED. Clean with alcohol pad and use primer prior to installation. Install the LED on the rear arm facing the ground.

16" extension wire connect to LED strip on swing arm.
