

# RYKER RGB CHASER KIT 3. [TRICLEDD.COM](http://TRICLEDD.COM)

## Contents for Kit 3

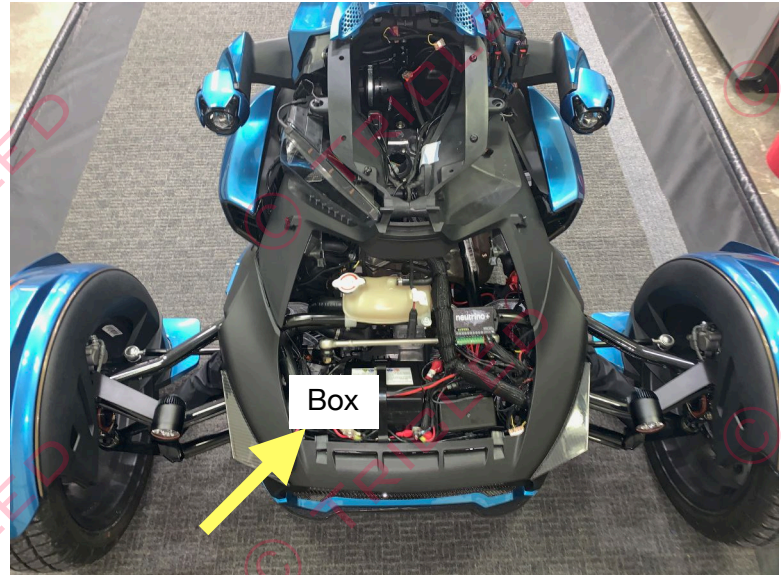

Shown above

- (1) 27" smoke tube chaser strip
- (2) 6" under seat chaser LED

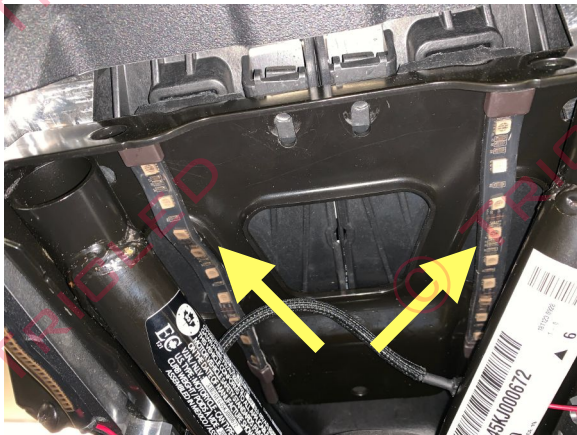

Not shown

- (1) 80" extension
- (1) 24" extension
- (2) 1:2 splitter

Alcohol cleaner  
Primer

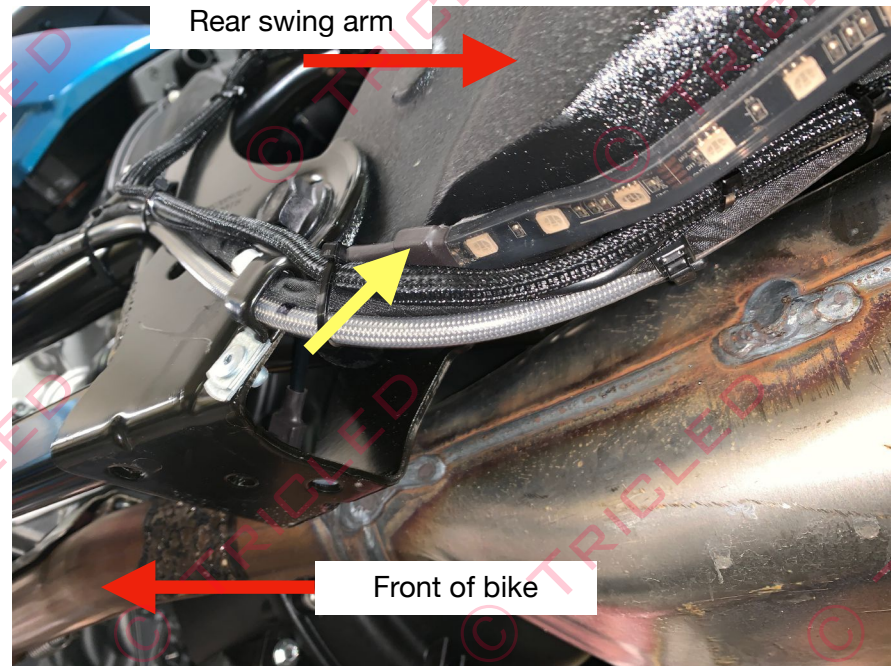

You will be making connections to the original module box. Use one of the open ports for kit #3

Test fit the LED under the driver seat.

Clean surface with alcohol and apply primer and let dry.

Apply LED with wires going forward, connect 1:2 splitter to both LED. Connect 24" Extension to 1:2 splitter and run along frame and down towards the bottom. Be sure to zip tie all loose wiring

This is a view from underneath the rear swingers. You will need to remove this lower side panel top route wires neatly behind the panel.

Test fit the 27" LED from this yellow starting point to the rear. See next 2 photos. Clean surface with alcohol and apply primer in multiple coats

## RYKER RGB CHASER KIT 3. [TRICLEDD.COM](http://TRICLEDD.COM)

Start from yellow arrow with wire facing the front. Adhere the strip along the flat ridge to the rear of the swingarm

End approximately here towards the rear.

Connect a 1:2 splitter to the swing-arm LED. Attach the extension from under seat LED to this 1:2 splitter.

Use the 80" extension and connect to 1:2 splitter and route wire all the way to the front and connect to the open connector on the module.

If you install all 3 kits you will have 1 port left over for future expansion.

Be sure to apply di-electric grease on all connectors and zip tie all wires snug to the framing of the Ryker
