Gullwing Install Instructions

TO REMOVE GLASS WINGS:
1. Disengage and remove shock by pulling from insert.
2. Use the clear plastic buffer (provided) at the back T of wing.
3. Hold FIRMLY in place while sliding the panel off.
4. Make sure plastic is under the bar of the wing before sliding. THIS IS USED TO PREVENT SCRATCHING THE BACK GLASS!!

TO RE-INSTALL:
1. Make sure the clear plastic buffer is in place.
2. Align the black tube on the center frame with the slot on the wing and slide glass in place.
3. When reattaching the shock, the slim part goes up and should be reattached first.

CARE: Use a non-abrasive cleaner for heavy dirt. A microfiber towel has been included for light dust.
