

LEFT OR
RIGHT SIDE
BOTTLE
HOLDER
SOLD
SEPARATELY

This cool add-on LED backlight kit for bottle holder provides side visibility. Easy installation and powered by the acc port with plug & play harness.

Using an 8mm allen socket, remove the factory bolt. It will be tight due to the factory loctite, remove it slowly and retighten to get it loose. Remove factory screw.

Use the 10-24 button socket cap screw and insert the washer. Position as shown above. Push in the screw, bolt and washer so it sits flat against the bottle holder. Use the locknut and tighten from the back side.

Use the 80mm socket cap screw and insert it through the outside of the bottle holder, then insert spacer behind the holder though the bolt.

Apply Loctite liberally on the ends of the threads. Using 8mm allen socket, tighten the screw until snug.

Use the two silicone square provided and apply it to the bottom side of the metal bracket marked wit the red dot above to protect your frame.

Installation for Add-on LED kit.

LEFT SHIFTER SIDE

Clean the back of the LED with alcohol wipe and let dry. Apply primer to the small area and adhere plastic zip tie square. Zip tie the wire.

With the bottle holder back facing up, position the led board against the top and nylon insert nut. With wire to the top. See red arrows.

When you have the LED positioned, peel back the double sided adhesive and adhere it a shown on previous step.

Open the front trunk and remove the plastic service panel. Remove top side panel on the shifter side.

Remove the 2 torx 25 screws on the bottom side of the panel.

Remove the 2 side torx 25 bolt near the rear of the panel.

Remove the 3 plastic push pins.

Cut the zip ties that holds the customer accessory wire

(Shown: accessory wire end covered from factory)

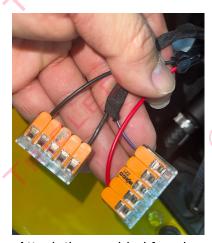

Cutoff the protective coating.

Strip the two wire ends. Black is ground wire. Colored wire is positive.

Use the lever locks, insert ground on one and positive on the other lever lock

Attach the provided female connector. Black to black ground and red to positive

Attach the female connector to the 1:2 splitter provided. Then connect 12" extension to the left shifter side bottle LED

For the Right-throttle side bottle holder with LED, connect the 24" extension to that side and the other end to the open 1:2 splitter.

\* If you purchase both sides, you will end up with extra parts and you can set these aside for future use.
